1. Use the **exact target keyword in the H1**. The exact keyword variations containing **“manufacturer” – 3 times, “supplier” – 3 times, and “exporter” – 3 times** should be used naturally throughout the 900-word content. The total usage of these target keywords should be limited to **9 occurrences**, while relevant keyword variations may be included **once each** where appropriate, each keyword should have 70 words distance from each other keywords should be placed appropriately and naturally not artificially stuffed.
2. The **URL slug should contain the primary target keyword**, and the meta title and meta description should incorporate the target keyword naturally and appropriately.
3. The content should include a relevant and well-structured **FAQ section** addressing common user queries related to the topic.
4. Use **unique, relevant, and high-quality images (in compressed form)** to enhance the content and provide visual value to users.
5. The page should have an **attractive, clean, and user-friendly design**, with a clear content structure and easy navigation.
6. Implement **proper internal linking** to relevant pages across the website to improve navigation, topical relevance, and overall SEO performance.
7. Meta title should be of 35-55 character , meta description should be of 110-155 character , example metas for page - https://varahvet.org/west-bengal/animal-feed-supplements.php,
   Meta Title - Animal Feed Supplements Manufacturer in West Bengal | VARAH
